INTRODUCING

Kühl FANS

INTELLIGENCE WITH STYLE
TO MATCH YOUR ELEGANT LIFESTYLE

It's time to make a style statement. It's time to turn the centerpiece of your room into a masterpiece, with our new range of stylish fans. Kühl range of fans are so elegant and aesthetically crafted, it's like the perfect makeover you could imagine for your living space. Especially, when you get something that's not just beautifully perfect but also innovatively smart. It's like intelligence wrapped with style. An absolute rejuvenating experience we all wish to live by. Kühl fans come with energy efficient BLDC motors. These motors generate less heat, have low power consumption as compared to induction fans, and save up to 65% electricity. Kühl Fans are thoughtfully engineered for remote operation through Smartphones, Remotes, Alexa/Voice commands, and are also Wi-Fi/IoT enabled to add convenience to daily usage. It comes with aerodynamic technology, low-noise functionality and elegant designs that add style to every home. They also have a reverse mode that helps in circulating warm air from the ceiling, to the room during winter.

CUTTING-EDGE TECHNOLOGIES

STYLISH DESIGN TO MATCH YOUR LIFESTYLE

The Kühl BLDC fans are a perfect combination of Smart Inside and Stylish Outside. They are not only functional and efficient but they also come with a stylish appeal. The Kühl range of fans are designed with long aerodynamic blades, modelled on airplane foils for better air delivery. The range of colors and wooden finish options enhance your home décor, giving every room a stylish edge.

What's more? The Kühl range of fans also comes with a down and night light that brightens up the room, and gives your home an aesthetic appeal. Along with the smart features, and the stylish modern technology, the Kühl fans also make your home look more glamorous!

FOR OUTSTANDING PERFORMANCE

AERODYNAMIC BLADE DESIGN

Kühl range of fans are stylishly designed to perfectly match your home interiors be it traditional or contemporary. Aerodynamic blades of ABS and Aluminium give a stylish edge to the fans. The vibrant colours and beautiful designs have been very thoughtfully chosen, making the fan a masterpiece for every room.

BLDC TECHNOLOGY SAVES ELECTRICITY

BLDC stands for Brush Less Direct Current Technology. BLDC motor generates less heat and have longer life span. Kühl BLDC fans consume only 28 Watts power, at full speed, as compared to traditional induction fans that consume 80 Watts. Hence, they save up to 65% electricity. Capital Investment in changing these fans will be paid back with in 12-24 months from the savings.

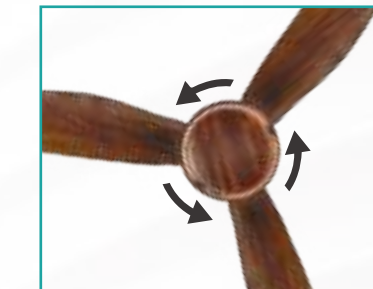

LOW RPM WITH HIGH FLOW RATE & LOW-NOISE

The Kühl range of fans operate at a lower RPM efficiently spreading air to every corner of your living space. Modern materials like aerodynamic blades, ABS and Aluminum, reduce friction and fan noise. The result? low-noise air delivery that's sheer joy.

ALEXA / VOICE ENABLED & IOT BASED

The fans come equipped with smart features like voice enabled technology and voice commands through Alexa, adding convenience to your life. Other remote operation features include operation through Smartphones, Wi-Fi/IoT and remote control.

REVERSE MODE

Reverse function helps in bringing the warm air near the ceiling back to the lower half of the room. It's of great use in winter. You can also use the reverse function of your fan if your air conditioning vents are near the floor. In such a scenario, putting the fan into reverse can draw the cool air upwards and circulate it in the room so that you can really feel it. Thus helps in maximising the effectiveness of AC.

PROUDLY MADE IN INDIA

All our Fans are 5- Star Rated by BEE.

Most of our Fans are BIS Certified.

A TOUCH OF LUXURY

LUXUS SERIES

Elegance & high performance are redefined with our range of Luxus Fans. Its specially designed super-efficient BLDC motor and aerodynamic technology save more energy and money. Smart features like Remote Operation, Smartphone, Wi-Fi/IoT and Alexa/Voice enabled adds to your convenience and the down light and night light sets the mood for a blissful experience. What's more? It keeps you warm during winter with its reverse mode circulating warm air to the lower half of the room efficiently.
